

SMART INDIA HACKATHON 2025

TITLE PAGE

- **Problem Statement ID** –SIH25060
- **Problem Statement Title**- Real life solutions for Waste Management.
- **Theme**-Clean And Green Technology
- **PS Category**- Software
- **Team ID**- 76591
- **Team Name**- CityZen

PROBLEM STATEMENT

- Citizens struggle to report civic issues efficiently.
- Poor waste management harms health and the environment.
- A system is needed to **motivate participation, speed up resolution, and utilize waste effectively.**

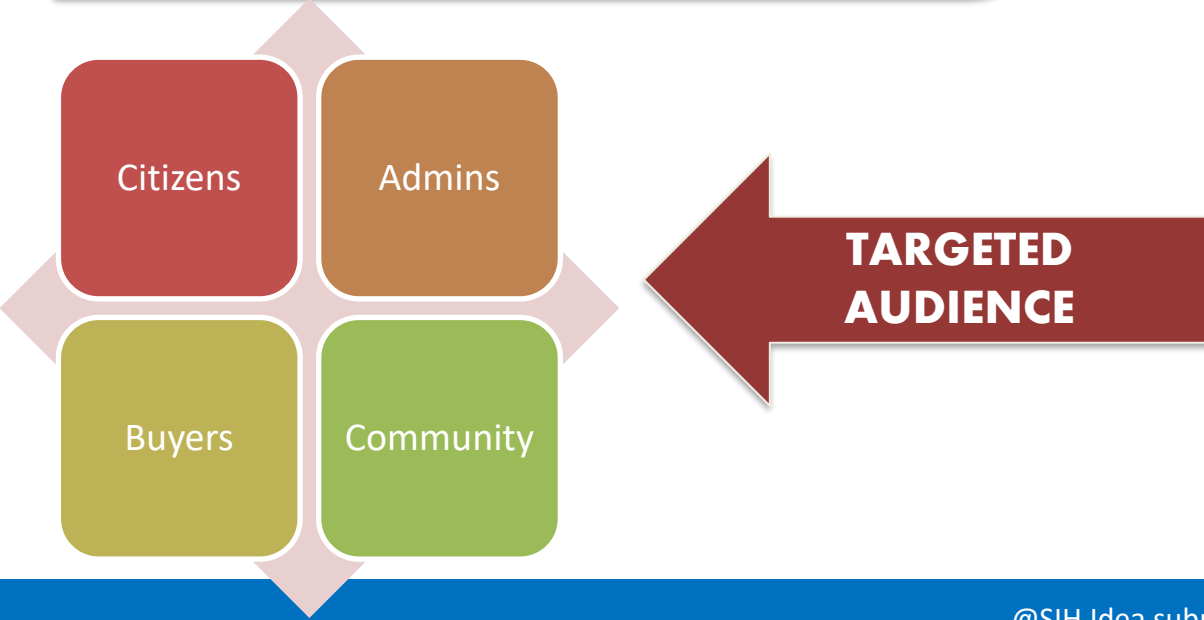

PROBLEM SOLUTION

Connects citizens with authorities for easy reporting and priority-based resolution.
Encourages proper waste segregation(wet,dry,Hazardous).
Includes a Training Hub to educate citizens.
Motivates participation through coins and gamification.

Promises:

- Quick Reporting & Priority Action
- Training & Guidance
- Rewarding Participation
- Resource Utilization
- Transparency & Tracking

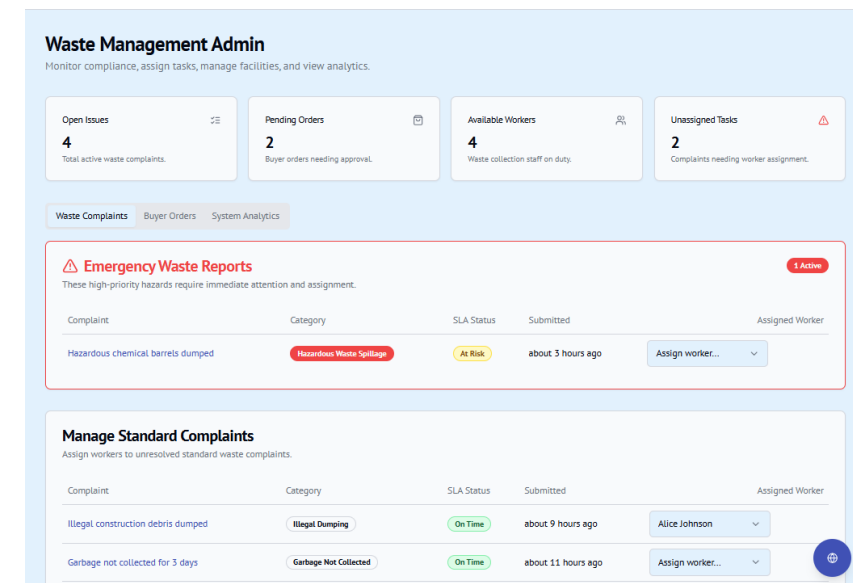

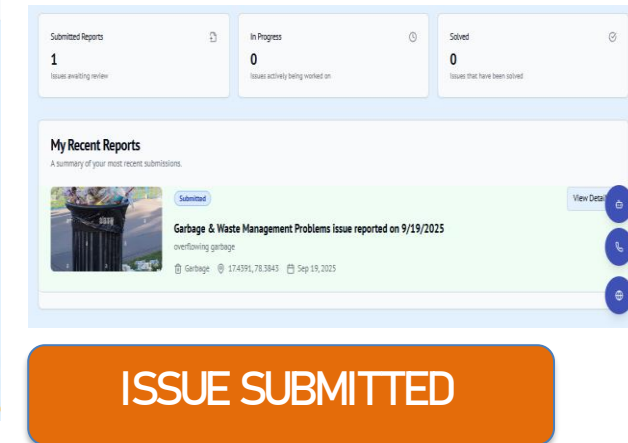

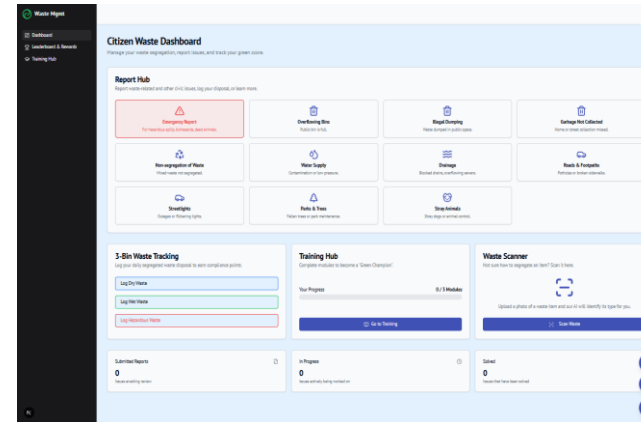

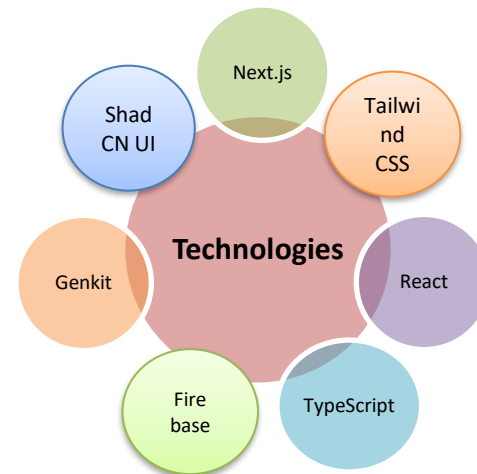

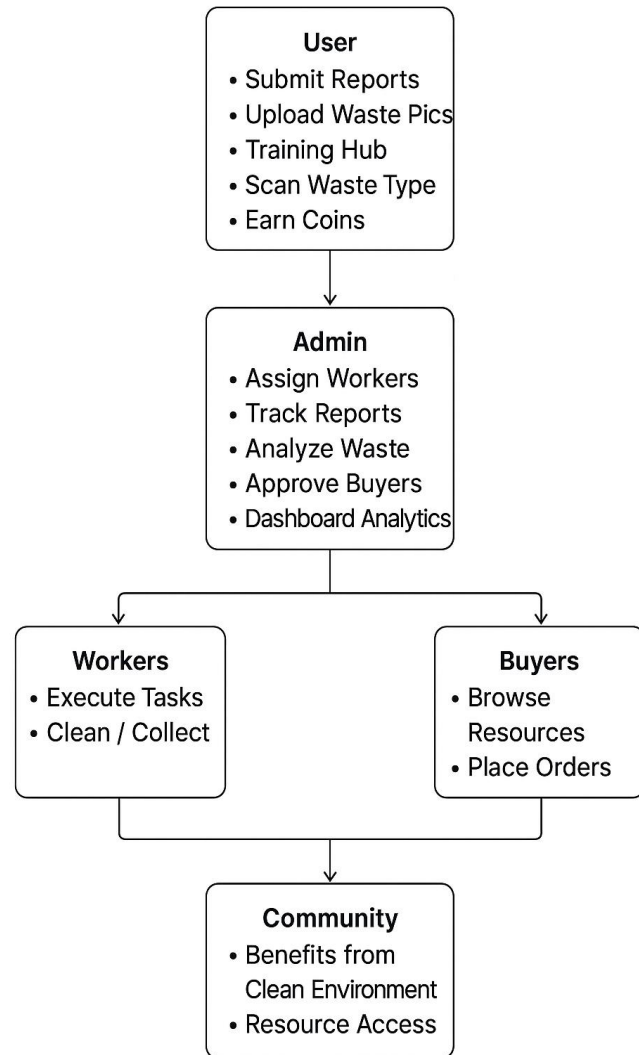

“Learn. Segregate. Earn. Impact.”

The diagram illustrates the 'TARGETED AUDIENCE' for the CityZen project. It features a central dark red arrow pointing left towards the 'PROBLEM SOLUTION' box. To the left of this arrow is a cluster of four colored squares: a red square for 'Citizens', an orange square for 'Admins', a yellow-green square for 'Buyers', and a green square for 'Community'. These squares are interconnected by a light pink double-headed arrow, indicating a network or interaction between all four groups.

**TARGETED
AUDIENCE**

TECHNICAL APPROACH

FEASIBILITY AND VIABILITY

**TECHNICAL****COST EFFECTIVE****OPERATIONAL****SOCIAL**

Challenges

- Low participation
- Multiple reports
- Connectivity issues
- Lack of source segregation
- Illegal dumping
- Waste not utilized effectively

Strategies to overcome

- Reward system
- Redundant report alert
- Offline auto sync
- House-Hold Campaigns
- Spot fines , Photo reporting
- Connect with **end-users/recyclers**

Viability

Enables citizens to actively manage waste, creating a cleaner and more sustainable environment.

Impact:

Social Impacts: Citizens report issues, segregate waste, and earn rewards.

Environmentally: Reduces litter and promotes reuse like compost and recyclables.

Economically: Creates value from waste and lowers cleanup costs.

Digital and Governance: Makes easy for government to main society clean.

Analogy: “Our project works like a bridge — connecting citizens, authorities, and end-users to turn waste into value.”

Benefits:

- Simplicity
- End-User Linkage
- Accessibility
- Engagement
- Trust
- Efficiency
- Collaboration (Citizen-Government)

Smart City Apps → These allow residents to report civic issues to respective municipal corporations. ApnaGHMC Portal – GHMC’s official citizen services portal.
